

The company was founded in 1999 to help its clients improve their supply chain and logistics competencies in its Asian operations. We work throughout Asia with operations and offices in China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore, Taiwan, Thailand and Vietnam.

The company has a consulting team drawn from Asia and the West. As a team we have many years of experience in managing and improving supply chain operations in Asia. The team has skills varying from the most hands-on operational to complex forecasting and mathematical optimization skills.

From the outset, we have maintained a very sharp focus on achieving the best possible outcome for our clients and on meeting or exceeding project deliverables. As a result we have developed a very strong client base, with over 80% of clients becoming repeat users of our services.

Our Services

CONSULTING

- Forecasting, Inventory & Supply
- Transport & Warehouse Operations
- Network Optimization & Route-to-Market
- Mapping & Geographic Services

LUCIA

How we operate

Clients use LCA because we are practical and 'hands-on'. We work with senior management to establish clear project deliverables and to create the right environment for success. We then drive the project through to completion.

Much of our work is implementation focused. In such cases we take full accountability for successful completion and sustainability of results. We work closely with our client's people, creating belief in the project, pushing, encouraging and mentoring them, but all the while ensuring that 'ownership' of the outcome stays with them.

We have an informal style, but we are fanatical about meeting deliverables... everytime!

We undertake projects of any scale. These can range from a few days in duration to months, and even years.
